

Scoring Rubric: Creative Interprofessional Team Event Award

Script Your Future Medication Adherence Team Challenge Scoring Rubric: Creative Interprofessional Team Event Award

There are four focused activity awards.

- Health Disparity/Under-represented Community Outreach Award
- **Creative Interprofessional Team Event Award**
- Media/Communications Outreach Award
- Tech Innovation Award

For the *Creative Interprofessional Team Event Award*, reviews should look for the role of each team member, how the intervention features their interprofessional talents, and how the interprofessional collaboration can be used in other models.

Focused activity award applications, which should be no more than three pages, will be reviewed separately from the national award applications. There are five areas for scoring applications, weighted as follows:

Team Members	20 points
Scalability	20 points
Program Intervention	25 points
Outcomes Measured	25 points
Lessons Learned	10 points
TOTAL	100 points

Applications will be graded using a scale from 1-10 (with 10 representing the highest quality/points). Reviewers will input the score in each category using the range of 1-10. The worksheet will automatically multiply and populate the spreadsheet, totaling the final score.

Scoring Rubric: Creative Interprofessional Team Event Award

Overall Influence	<i>Non-Applicable (0 points)</i>	<i>Fair (1 -4 points)</i>	<i>Good (5-7 points)</i>	<i>Excellent (8-10 points)</i>
