

## ***Script Your Future Medication Adherence Team Challenge Scoring Rubric – 2024***

The following scoring rubric will be used to score all Team Challenge reports for 2024. Team Challenge reports must include:

- A report (5 pages or less) describing the team’s activities
- An appendix including support materials, such as event photos, testimonials from targeted communities, social media materials, etc.

Applications are scored in three areas: Overall Influence; Core Composition; and Program Details. The categories are weighted according to importance, with a maximum score of 220 points total. The weighting for each area is as follows:

Overall Influence (Impact and Creativity)	100 points
Core Composition (Interprofessional Team and <i>Script Your Future</i> Focus)	40 points
Program Details (Interventions and Outcomes Measured)	80 points
TOTAL	220 points

Reviewers will grade applications using a scale from 1-10 (10 representing the highest) for each score category and will input each score into the appropriate place on the spreadsheet. The worksheet will automatically multiply and populate the spreadsheet adjusting for weight, totaling the final score.

### **Suggested Outcomes Measured**

Measured outcomes of the activities (*may include, but not limited to the following*)

- Event name, date, and type
- Population(s) targeted (Seniors, Health Care Professionals, Young adults, Parents, etc.)
- Total number of volunteers and health professions represented
- Total number of volunteer hours
- Total number of materials disseminated (SYF medication list wallet cards, posters, customized materials, etc.)
- Total number of patients/consumers reached at events (utilizing COVID safety precautions)
- Total number of patients directly counseled about medications and/or vaccines (utilizing COVID safety precautions)
- Total number of patients introduced to SYF website and online tools; Signing up for text reminders; Taking the *Script Your Future* pledge; Viewing the SYF educational videos on specific chronic diseases and/or vaccine confidence
- Evaluation measures of the activities (Example: pre- and post-surveys)
- Total number of letters-to-the-editor, op-eds, media impressions, etc. (include details for types of publications and media outlets)
- Total number of social media followers and engagement

## INFLUENCE SCORE

<i>Score Category</i>	<i>Not Applicable (0 points)</i>	<i>Fair (1 -4 points)</i>	<i>Good (5-7 points)</i>	<i>Excellent (8-10 points)</i>
<b>Team Impact</b> <i>Does the Team have an effect on the medication adherence and/or vaccine confidence in its community?</i>	This proposal does not describe an impactful effect on increasing medication adherence and/or vaccine confidence.	This proposal describes a slightly impactful effect to increasing medication adherence and/or vaccine confidence.	This proposal provides a moderately impactful effect to increasing medication adherence and/or vaccine confidence.	This proposal describes a very impactful effect to increasing medication adherence and/or vaccine confidence.
<b>Team Creativity</b> <i>Does the Team provide an original or innovative, approach to increasing medication adherence and/or vaccine confidence?</i>	This proposal does not describe an innovative approach for increasing medication adherence and/or vaccine confidence.	This proposal describes a slightly innovative approach for increasing medication adherence and/or vaccine confidence.	This proposal provides a moderately innovative approach for increasing medication adherence and/or vaccine confidence.	This proposal describes a very innovative approach for increasing medication adherence and/or vaccine confidence.

## CORE COMPOSITION SCORE

<i>Score Category</i>	<i>Not Applicable (0 points)</i>	<i>Fair (1 -4 points)</i>	<i>Good (5-7 points)</i>	<i>Excellent (8-10 points)</i>
